

Marco Orlandi

DATA ANALYST

ABOUT ME

I am a graduate in Economics and Data Analysis who became particularly passionate about the world of data analysis during my academic journey. I began to deepen my knowledge of this field by learning Python and SQL, which I continue to explore to this day. My personal goal is to work in an environment where I can interact daily with the management and analysis of corporate data in order to produce results that can help drive business growth.

WORK EXPERIENCE

BI & Accountant Assistant at OLI S.p.A. - Medolla (MO) 09/2019 - 9/2021

The main role was related to the management of the accounts payable cycle through the SAP management system and the AE portal. This involved the following activities in detail:

- Management, control, and insertion of supplier data
- Management of the flow of delivery notes, including their collection and control
- Management, preparation, and registration of purchase invoices, credit notes, as well as activities related to cancellations and balancing of accounts
- Management and registration of import bills
- Creation of Finance and Human Resources dashboards through the PowerBI application. Specifically, the first dashboard provides an overview of the company's performance over a set of years, both at the group and individual company level, using accounting ratios and balance sheet values. The second dashboard allows for quick visualization of various metrics related to foreign personnel, such as the total inflow and outflow or by individual branch, as well as the average salary (also filtered by gender).
